

## SHOPPING FOR NEW CABINETS?

*Make sure the products you choose have these features*

- 1) **Centered fixed partitions** installed (in cabinetry built over 36" in width).
- 2) Shelves, 11/16" with front and rear edges banded; surfaced with a 5-mm white or wood-grain surface. Adjustable on steel clips; routed beneath for positive stop. **There is never a need for shelf liner!**
- 3) All cabinetry constructed in either a **M2 furniture-grade particleboard or plywood options**.
- 4) Cabinetry offered in both **frameless and framed** specialty created and sized construction.
- 5) All cabinetry doors operate on a fully concealed clip-on 110-degree opening—self-closing, six-way adjustable, with an **integrated "soft-close"** feature.
- 6) Drawers, 5/8" thick **full height**, dovetailed with 1/4" thick bottoms, available in Maple, Cherry, Walnut and hardwood construction—as well as white, black, gray, and stainless finishes.
- 7) Drawer glides: Blumotion Tandem full extension undermount, with **90-lb. capacity** and Blumotion soft-close feature.
- 8) Wood-Mode personally dries its own lumber, which is very critical, due to change in wood dimension. The company maintains a high level of commitment to **controlling moisture content** throughout cabinetry construction.
- 9) Hand-wiping stains using a multi-step **baked-on finish process**.
- 10) **Cabinets should come with a limited lifetime warranty.**
